Studio / 1104 N. Mills Ave.
Orlando, Florida 32803

Palm tree is Copper (leaves & husk) and Bronze (trunk & stalks). Approximately 12 feet in height designed as a collaborative effort with the clients.

ARTIST'S STATEMENT

Having worked in wood, stone, clay, plaster and a variety of metals, I find myself enjoying my work in metal the most. In the 60's metal was the first medium that attracted me to sculpture. During this time I was welding left-over car parts together. Through metal there is the utilitarian side that allows my art to be used to create furniture, gates and other architectural items. The other mediums are almost exclusively used in art.
